

# Bact-Care™ Dry

The purpose of **Bact-Care™ Dry** is clearing and/or keeping clear raw materials for feed or finished feed products of Salmonella, Campylobacter and other pathogens. **Bact-Care™ Dry** is effective against a **wide range** of pathogenic bacteria, and fungi.

It **prevents bacterial recontamination** over longer periods of time. **Bact-Care™ Dry** is used for treatment of various animal and plant-based protein products and is very suitable for flushing factories. This keeps conveyor systems, silos etc. clean and minimizes the risk of (re)contamination.

**“innovation in decontamination”**

## Composition

**Bact-Care™ Dry** contains organic acids. The specific components reinforce each other's effect. The selected raw materials prompt a synergistic effect.

## Dosage recommendation

Depending on the physical and chemical properties of the product to be treated, a dosage of 3 to 5 kg per ton can be used in feeds. In case of flushing the factory or transport lines, it is recommended to use pure product or a 50/50 blend with raw material. This (blended) product can be collected in a Big Bag and may be used for flushing three or four times.

Before factory decontamination we would like to discuss the options with you.

## Packaging

Standard packaging for **Bact-Care™ Dry** is 25 kg bags on 1000 kg pallets.

## Storage

**Bact-Care™ Dry** is best stored in a dry and cool place in its original closed packaging. It is stable and has a shelf life of at least 24 months.

**“Decontamination does not only entail the addition of a product like Bact-Care™ Dry. It is essential that the correct dosage and dose point are ascertained and that the method used suits the customer. Therefore the right concept is always decided in consultation with the user.”**

## Product safety

When the correct recommended dosage is used **Bact-Care™ Dry** will not cause any toxicity in the treated product.

## Efficacy

**Bact-Care™ Dry** is effective against a wide range of pathogenic bacteria, yeasts and fungi. It is an effective antibacterial agent and is able to prevent bacterial recolonization (**recontamination**).

**“inspired by Nature,  
scientifically proven”**

## E.F.S.-Holland B.V.

Euro Feed Services Holland was established in 1996 by Cees Twint and Bert van Bremen.

E.F.S. keeps developing continuously. As a result of consistent innovation, our position at the forefront of the market and building an extensive network we have become a trusted partner to many relations.

E.F.S. specialises in two fields: 1: Health promoting products, additives and raw materials for compound feeds and 2: Bacteriological control of raw materials and compound feeds.

By developing our own products and concepts and close cooperation with customers and other partners we contribute to a sustainable sector and strive to ensure continuity. Our professional and energetic team is available on a daily basis to serve our clients to the best of its ability. In 1996 we started our deliveries, then only in the Netherlands. Today we do business with companies in more than 30 countries all over the world.

'APC Nutrients is our business partner with its professional team and superior customer relations in the market to help Indian customers validate E.F.S.-Holland's feed additives. Together, with APC Nutrients, we strive to solve many of the customer challenges with our solid quality backed solutions'.

This makes us E.F.S.!
