

# Moldstat™

The purpose of **Moldstat™** is diffusing formation of moulds. **Moldstat™** is an anti-fungal, cost effective technology, yet performance driven complementary feed designed to **provide extended feed preservation.**

## Composition

**Moldstat™** contains propionic acid which is a naturally occurring carboxylic acid used for inhibiting the growth of moulds (fungi).

## Efficacy

**Moldstat™** works by entering into mould cells in un-dissociated form and to ionize the cells' internal pH environment. This mechanism reduces the ability of mould cells to survive and multiply.

**Moldstat™** protects the animal feeds (even pellet) from the proliferation of moulds yeasts and prevents mycotoxins production. Furthermore, it inhibits the fermentation and consequently the caking phenomenon and the loss of nutritive substances. Feeds will be protected for 3 weeks or more depending on environmental factors (variation in temperature, ventilation and moisture). Besides protection of the feed, **Moldstat™** helps to improve palatability of feed and thereby feed intake.

## Dosage recommendation

A dosage of 1 kg per ton can be used in feeds.

## Product safety

**Moldstat™** is safe and effective with all ingredients normally used in animal feeds. It is manufactured and sold in strict compliance with GMP+ standards for purity and quality.

## Physical properties

**Moldstat™** is a free flowing, fine granulate which is easy to handle and use.

## Storage

**Moldstat™** is best stored in a dry and cool place in its original closed packaging. It is stable and has a shelf life of at least 24 months.

## Packaging

Standard packaging for **Moldstat™** is 25 kg bags on 1000 kg pallets.

**Contact our distributor APC Nutrients and test Moldstat™!**

scientifically proven”*

## E.F.S.-Holland B.V.

Euro Feed Services Holland was established in 1996 by Cees Twint and Bert van Bremen.

E.F.S. keeps developing continuously. As a result of consistent innovation, our position at the forefront of the market and building an extensive network we have become a trusted partner to many relations.

E.F.S. specialises in two fields: 1: Health promoting products, additives and raw materials for compound feeds and 2: Bacteriological control of raw materials and compound feeds.

By developing our own products and concepts and close cooperation with customers and other partners we contribute to a sustainable sector and strive to ensure continuity. Our professional and energetic team is available on a daily basis to serve our clients to the best of its ability. In 1996 we started our deliveries, then only in the Netherlands. Today we do business with companies in more than 30 countries all over the world.

'APC Nutrients is our business partner with its professional team and superior customer relations in the market to help Indian customers validate E.F.S.-Holland's feed additives. Together, with APC Nutrients, we strive to solve many of the customer challenges with our solid quality backed solutions'.

This makes us E.F.S.!
