

# Tox-Cure Plus™

**Tox-Cure Plus™** aims to counteract the negative effects of **mycotoxins** in the animal. This is achieved by the use of three natural ingredients: **inactivated yeast, bentonite** and **plant extracts**.

## Composition & efficacy

Bentonite is able to bind mycotoxins, while inactivated yeasts are - in addition to their binding capacity - also able to **deactivate** mycotoxins by means of enzymes. These enzymes convert the structure of the mycotoxins into a **harmless** form which is subsequently excreted.

The adverse effects of mycotoxins often only become visible after a while (sometimes weeks or months) after contaminated feed is given. E.F.S. therefore recommends regular analysis of raw materials and feed for the presence of mycotoxins.

## Dosage recommendation

A dosage of 0.5 to 2.5 kg per ton can be used in feeds. This depends on the type and level of mycotoxins in feed.

## Packaging

**Tox-Cure Plus™** is available in bags of 25 kg on 1000 kg pallets.

## Storage

**Tox-Cure Plus™** is best stored in a dry, cool place without direct sunlight in its original closed packaging. It is stable and has a shelf life of at least 24 months.

Through decades of cooperation with the most leading company in the world with regard to mycotoxins, E.F.S. has built an extensive database with information on mycotoxins and mycotoxin inactivation.

This **expertise** and acquired experience formed the basis of the development of **Tox-Cure Plus™**.

**Do not give mycotoxins a chance.  
Contact our distributor APC Nutrients  
and test Tox-Cure Plus™!**

***“inspired by Nature,  
scientifically proven”***

## E.F.S.-Holland B.V.

Euro Feed Services Holland was established in 1996 by Cees Twint and Bert van Bremen.

E.F.S. keeps developing continuously. As a result of consistent innovation, our position at the forefront of the market and building an extensive network we have become a trusted partner to many relations.

E.F.S. specialises in two fields: 1: Health promoting products, additives and raw materials for compound feeds and 2: Bacteriological control of raw materials and compound feeds.

By developing our own products and concepts and close cooperation with customers and other partners we contribute to a sustainable sector and strive to ensure continuity. Our professional and energetic team is available on a daily basis to serve our clients to the best of its ability. In 1996 we started our deliveries, then only in the Netherlands. Today we do business with companies in more than 30 countries all over the world.

'APC Nutrients is our business partner with its professional team and superior customer relations in the market to help Indian customers validate E.F.S.-Holland's feed additives. Together, with APC Nutrients, we strive to solve many of the customer challenges with our solid quality backed solutions'.

This makes us E.F.S.!
