

BIO-F

Probiotics for Fish Farming

Composition

High concentration of Beneficial Bacteria

Functions

Higher content of organic load is the major concern in fish farming. This leads to proliferation of Pathogenic bacteria like *Vibrio* Spp. and *Aeromonas* Spp. which cause diseases, affecting growth and increases mortalities, polluting the pond bottom etc. To overcome this problem, we need good quality probiotic which helped the fish to attain growth and at the same improves the water quality and Rejuvenation of pond bottom.

Bio-F is Probiotic specially formulated for fish farming and to improve the water quality of the pond.

Bio-F provides two billion per gram of naturally occurring live Micro organism which improves the growth and survival of fish.

Regular supplementation of **Bio-F** stimulates non-specific immune system, improves GUT flora thereby help to increase feed assimilation, increases productivity by minimizing the risk of disease outbreak.

APC Nutrients

BIO-F

Probiotics for Fish Farming

Bio-F inhibits pathogen by production of antagonistic compounds, competition for attachment sites in host tissue, competition for nutrients and alteration of enzymatic structure of pathogens, Bio F also act as immunostimulatory functions and nutritional benefits such as improving feed digestibility and feed utilization

Benefits

Bio F improve water quality, feed digestibility and utilization hence improves growth and productivity

Dosage

As directed by Aqua Consultant

Aqua Feed Supplement
Not for Human Use
Store Under Room Temperature
