

BIO-KLEAN

Water & Soil Probiotic

Benefits of BIO-KLEAN

- Reduce ammonia, Nitrogen levels and other Noxious odour. Thus creating a healthy pond Environment
- Improves dissolved oxygen level
- Dissolves away organic sludge and smilt
- Nitrosomonas and Nitrobacter help to degrade organic wastes and faecal matter
- Enzyme producing bacteria helps in the absorption of feed
- Thus ensures better growth of shrimps

Application procedure

- Activate BIO-KLEAN by soaking 1 kg of dried Culture in 20 litres of pond water. Soak for at least 4 hours with occasional stirring before application
- Apply slurry at highest pond level and along pond perimeter
- Continue running aerators as the usual practice

Recommended Dosage

As directed by Aqua Consultant

During Culture: 1-2 kg/hac

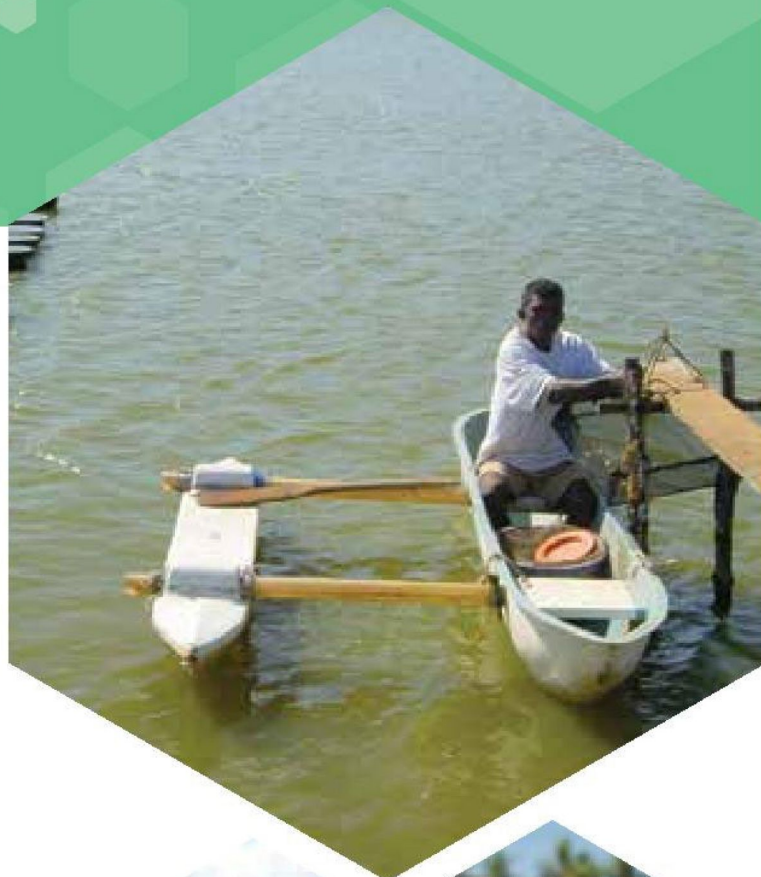

Pack: 500 Gms and 1 Kg

Aqua Feed Supplement

Not for Human Use

Store Under Room Temperature

 **APC Nutrients**

Note: Application of Antibiotics and Chemical Disinfectants are avoidance when BIO-KLEAN is in use

BIO-KLEAN

Water & Soil Probiotic

BIO-KLEAN is a scientifically blended concentration of selected and adapted cultured Bacillus species and other beneficial organism combined with activator that will promote growth of microbial community.

Composition

Each kg Contains 5000 billion CFU of

- Bacillus subtilis
- Bacillus licheniformis
- Bacillus polymyxa
- Bacillus megaterium
- Bacillus pumilus
- Lactobacillus sporogenes
- Saccharomyces cerevisiae
- Nitrosomonas, Nitrobacter and Betaine Anhydrous

Function

- BIO-KLEAN contact live non pathogenic microorganisms that provides colonization resistance to the pathogenic microbes and thus are effective in prevention and treatment of some diseases.
- Improves the health of shrimp by controlling pathogens and improving water quality by modifying the microbial community of pond water
- BIO-KLEAN plays a vital role in growth, survival and disease resistance of the aquatic animal by maintaining good water quality parameters throughout the culture period. Probiotic treatment offers a promising alternative to the antibiotics for Fish and shrimp aquaculture system
