

CRAMP-CHEK

Nutritional supplement to check and prevent cramps

Muscle cramp syndrome is a common phenomenon in grow out ponds due to stress caused by temperature fluctuations and Electrolyte imbalances in the culture system. It is observed very clearly at the time of sampling and checking the feed trays. To prevent this we have developed **CRAMP-CHEK** to overcome this stress and to have a better growth with increased survivability.

Composition

CRAMP-CHEK is a unique blend of specific vitamins, amino acids along with essential Electrolytes

APC Nutrients

CRAMP-CHEK

Nutritional supplement to check & prevent cramps

Benefits

- **CRAMP-CHEK** controls the stress due to temperature fluctuations by increasing the thermal tolerance level of Shrimp
- **CRAMP-CHEK** corrects the specific mineral imbalances responsible for muscle contractions and relaxations by increasing the productions of serotonin
- **CRAMP-CHEK** minimises the crowding stress in the culture system
- The specific amino acids in **CRAMP-CHEK** ensures the production of homarine, 5HT, and GABA to maintain the neuro muscular functions.

Thus regular supplementation of **CRAMP-CHEK** ameliorate the stress in the culture systems and subsequently promotes the growth performance, Prevents mortality due to muscle cramping of Shrimps in grow out ponds

Dosage: 10gms/per kg of feed

Packing: 1kg

Aqua Feed Supplement
Not for Human Use
Store Under Room Temperature
