

PRO VIVO

High concentration of beneficial microbes in a granulated forms for easy administration.

Composition

Pro Vivo is multifunctional unique strains of bacillus which provides excellent protection during health challenges in shrimp/fish. The strains bacillus is highly resistant to environmental changes and presents antibacterial activity against broad spectrum pathogenic micro-organisms and also helps to maintain water quality.

Pro Vivo, unique strains of bacillus, provides significant growth reduction of pathogenic micro organisms across diverse species and maintains healthy pond environment.

Functions

Pro Vivo controls water pollution by Bio-remediation of Nitrite-N and Ammonia-N of aquaculture water at wide ranges of temperature and pH, thereby enhances water quality. It also reduces a wide range of water/air borne pathogenic microorganisms in the aquaculture system.

APC Nutrients

PRO VIVO

High concentration of beneficial microbes in a granulated forms for easy administration.

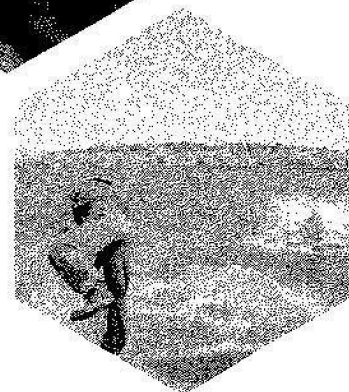

Benefits

- MULTI-STRAIN BACILLUS CONSORTIUM of "Pro vivo" ensures coverage against diverse health challenges in aquaculture system
- Improves FCR, drives optimum growth and consistency under challenge circumstances and minimize performance losses subsequently increases profitability.

Dosage

As directed by Aqua Consultant

Packing: 1 kg

Aqua feed supplement
Not for human use
Store under room temperature
