

ZEOBACT

Soil Conditioner

ZEOBACT is a biological pond cleaner for Prawn & Fish farming.

Composition

Each Kg Contains high concentration of beneficial microbes

Function

Zeobact is designed to breakdown dead algae, Prawn excreta, Excess feed, bottom sediments and slimes in culture ponds as well as builds and maintains healthy ecological environment and good pond condition.

- Reduces organic sulfur compounds
- Reduced manganese and sulfides
- To speedup decomposition of organic matter and to reduce COD mn, $\text{NH}_3\text{-N}$ and $\text{NO}_2\text{-N}$ in water and sediments so as to improve water quality;
- Enhances immune system of cultured aquatic animals and to produce bioactive compounds such as vitamins, hormones and enzymes that stimulate growth, and improves FCR

APC Nutrients

ZEOBACT

Soil Conditioner

Benefits of Zeobact

- Cleans pond bottom
- Eliminates the toxic odours by removing hydrogen sulphide, ammonia, nitrate etc through natural oxidative process
- Lowers the BOD level of pond water
- Promotes growth and increases survival rate

Application Procedure

- Activate ZEOBACT by soaking 1 kg dried culture in 20 litres of pond water. Soak for at least 4 hours with occasional
- Apply slurry at highest pond level and along with pond perimeter
- Continue running aerators as usual practice.

Dosage

1-2 kg per Hectare once in 15 days until the end of culture period

Pack: 1 Kg

Aqua Feed Supplement
Not for Human Use
Store Under Room Temperature

 **APC Nutrients**

Note: Application of Antibiotics and Chemical Disinfectants are avoidance when ZEOBACT is in use
